	<ul style="list-style-type: none"> <li>- The education was interspersed with theory and mostly practical work.</li> <li>- Areas and tools that have been used are: Value flows, Losses, 5S, Standardized work, Operator maintenance, Systematic problem solving and Daily control.</li> </ul>	
<b>Webbdesign, Multimedia &amp; VR</b>	2000-08-12 - 2001-06-01	Lärcenter Falköping
	- This included courses in Adobe Photoshop, Adobe Premiere, 3D studio Max, Macromedia Shockwave / Flash and html programming.	
<b>Film &amp; Video</b>	2001-02-01 - 2001-03-30	Lärcenter Falköping
	- Evening course that included most of digital filming, editing and editing. Also sound and light, as well as creation of scripts, screenplays and acting.	
<b>Goldsmith</b>	1998-08-14 - 2000-06-01	Lärcenter Falköping
	- Two-year KY (Kvalificerad Yrkesutbildning = Advanced vocational training) education for goldsmithing. Also included color and shape, design, presentation techniques and business economics.	
<b>Goldsmith</b>	1995-08-13 - 1998-06-06	Ållebergsgymnasiet Falköping
	<ul style="list-style-type: none"> <li>- Vocational high school program with a focus on goldsmith. Read all core subjects as well as business administration and self-employment.</li> <li>- Advanced course in hand engraving and frittling of gemstones.</li> </ul>	
<b>Elementary school High school</b>	1992-Augusti - 1995-Juni	Kyrkerörsskolan Falköping
	<ul style="list-style-type: none"> <li>- Grades 7-9 at Kyrkerörsskolan in Falköping. Chose what was then called; Great course in technology and image.</li> <li>- Read German as an optional language.</li> </ul>	
<b>Primary school and middle school</b>	1986-Augusti - 1992-Juni	Gudhems skola
	- Grades 1 to 6.	

## Other knowledge:

### Language skills:

*Swedish* – native, very good knowledge of both speech and writing.

*English* – Very good knowledge of both speech and writing.

*German* – limited knowledge.

*Serbocroatian* – limited knowledge.

*Swedish sign language* – limited knowledge.

### Driving license:

A, B(96)

### Other skills:

I have experience of giving lectures. Also manage groups for various activities in sport and team building. I've played in bands as guitarist and bass guitar and have a lot of experience of being on stage as a musician, actor and shows. I've got knowledge in Serbo-Croatian and sign language just by interest. With my involvement in motocross and enduro I've learned how to build safe tracks by regulations. Also practically how to drive a wheel loader, excavator and dumpster truck. I also have knowledge in how to service shock absorbers and rebuild wheels for dirt bikes. I'm handy and a fast learner. And learn what I need to if it comes down rebuild or renovate a house or rebuild a caravan with new floor, furnishings and putting in new electricity from scratch.

## In work:

In my current job, my focus is to help organizations to find improvements and losses in production. This is done by installation and education in a software that measure OEE (Overall Equipment Efficiency) that collects data for stop reasons, scraps and speed losses. Data that can be used to evaluate improvement work and/or basis for investment.

In previous position I worked with installation and implementation of a software that can be compared to a WMS system but for warehouse vending machines. Integration between software and the customer's business system where common, so consultation, project management and guidance to varying degrees are required. As I am naturally pedagogical and patient, the educations I hold are very much appreciated. In this role, I produced my own educational material and documentation, simply because it did not exist from the beginning.

I like to analyse data and help with trying to improve and assure quality in customers' different situations but also for myself and my own work. In addition, I try to do the little extra to exceed expectations and increase customer satisfaction. Being communicative and making sure that what I say arrives is important to me whether it is in Swedish or English. I'm good at communicate with both beginners, advanced users or managers in different situations as I can adapt my way of speaking, and to change from humorous to serious for the right situation.

Ever since I could start building my own websites in html in the late nineties, programming has been a big interest for me. I have tried different programming languages and I would like to do further education.

I am by nature very solution-oriented and if I get the space, I can be very creative. I like to rollick and that is something I do. For example, I have a tradition of reading a "cheeky" Christmas poem at the Christmas party for the whole company.

## Fun about me.

Ingenious already as a child but managed to split my finger. Won third prize in inventor competition in high school. I got the highest score on the aptitude test for the goldsmith education at the high school. Has been beaten bloody in front of a camera, been blown out of a window and ridden western riding to the left. Sharpened sword for 24 hours, been robbed in Romania, is cooler than Joe Labero, was bullied by knights and received standing ovations for filming Romeo and Juliet. Rhymed on Manchego and drove a tractor for ten hours on a motocross track. As well as jumped out of planes, had a half Caribbean cruise blown away and sneaked on alligators in Florida.

## Who am I?

"One have to experience a lot before you die."

Is a sentence that fits me pretty well as I have taken advantage of opportunities to try a little of each in my working life.

When I was in elementary school, I focused on becoming a goldsmith, because my father is. As there were opportunities to choose image and technology as an option, I saw this as an opportunity to prepare myself for suitable knowledge. In high school, I studied the goldsmith program at Ållebergsgymnasiet and then another two years goldsmith education at Lärcenter in Falköping. In the meantime, I found a great interest in computers and attended a web design course and learned a lot in my spare time. Both to build computers with different hardware components and programming.

Then working life began after school. Since my father has his own goldsmith's workshop, I have had the opportunity to keep my skills going by making some jewellery for friends, but also helping my father, and then especially with hand engraving. I have previously had work during the summer holidays and these made it possible for me to pay for my driving licenses myself. First qualification for "light" motorcycle when I was 16 years old, then qualification for car (B) when I turned 18 years old. Later I upgraded my license for "heavy" motorcycles. In the summer of 2018, I upgraded my B license to B96.

My first permanent job was as a warehouse worker but took over responsibility for IT at the same company. Then I got an opportunity to teach a year at an elementary high school and since I think math and languages are fun, I got to be a support to the students who had difficulties in these subjects. I enjoyed the teaching job and received good reviews from both students and teachers who thought I had a natural pedagogical talent. In 2004 I started to job at Falbygdens Ost. First as a warehouse worker and then I was warehouse manager. Later I took responsibility for the price labelling system and maintenance of printers in production lines. In the summer of 2015, my responsibility was expanded to production IT and management of article databases and collaborated with shift managers, the quality department and was part of the production management. In September 2016, I applied for a new job and was the first choice of candidates to be offered an employment at Kardex Sverige AB. I said yes. As a software consultant, I travel around to various companies with a project coordinating role for installation, solutions for flows in stock and training. During the years 2000 - 2004, a friend and I ran a company where we primarily did stunts for stage and film. It was everything from blowing fire and sword fights to producing and choreographing larger shows and giving lectures. At most we were over 50 people involved.

In my spare time, I played a lot of football (soccer) in my younger years. I like to play music by playing the electric guitar and the bass, but it has ended up a bit "on the shelf". I also like to photograph and film as well as edit and post-edit. Lately I have found motocross and enduro as a really fun and good form of training and actually it is so fun that I compete a lot. As motorsport does not get much attention in the media, I myself have written reports and taken pictures that have since been published in the local newspaper in addition to writing and posting videos on my blog that have WordPress as a tool. From about 35 years of age, I have received requests to sit on boards of various associations and think this seems interesting. And I've been responsible for training, as well as "track chief" for the Swedish Championships in enduro. In January 2019 and again in September 2020, I also had the great happiness of becoming a father. You can wonder where it goes next.

Best regards  
Robert Ahlin
